

Fabrication and Installation of a biogas reactor at Govt. Senior Secondary Girls School, Solan, HP (20 September, 2019)

Anaerobic digestion of food waste produces biogas which is used for cooking or lightning. Our centre has installed the biogas reactor for the utilization of school kitchen wastes for generating biogas in the Govt. Senior Secondary Girls, School Solan, H.P. The project associate Mr. Karam Dass visited Govt. Sen. Sec. School Solan and installed the biogas reactor on 20/09/2019. He was supported by their teaching, non-teaching staff and the students. He explained the working of reactor to them.
