

Reinstallation of the biogas reactor at Govt. Senior Secondary School, Barmana, Bilaspur, Himachal Pradesh. (31 October, 2018)

Anaerobic digestion of food waste produces biogas which is used for cooking or lightning. Our department has installed the biogas plant for the utilization of wastes for generating biogas in the Govt. Senior Secondary School Barmana, Distt. Bilaspur, H.P. in the year 2013. Due to some construction work, it got damaged and the school principal requested for the reinstallation of reactor. The project associate Mr. Karam Dass visited Govt. Sen. Sec. School Barmana and refabricated the biogas reactor on 31/10/2018. He was supported by their teaching, non-teaching staff and the students. He explained the working of reactor to them.
