REC Mini Namdeo Giri is presenting

The 5 female inventors

- Joyce Chen**
Chen's patent is for a flat-bottom wok with a handle, also known as a stir fry pan. Her patent, however, only hints at Chen's impact on the American culinary scene; Chen pioneered the all-you-can-eat Chinese buffet style, and popularized Northern-style Chinese food.
- Patricia Bath**
Source: Scholastic
Have you ever had laser eye surgery? You have Patricia Bath to thank for that. The first African American to complete a residency in ophthalmology in 1973. Bath invented the Laserphaco Probe, which uses laser technology to treat cataracts.
- Stephanie Kwolek**
Kevlar has many applications: bullet-proof vests, tennis rackets, tires, hurricane safe rooms, etc. Stephanie Kwolek was a chemist at DuPont when she invented the synthetic poly-paraphenyleneterephthalamide, a.k.a. Kevlar.
- Ann Makosinski**
One of the younger inventors on this list, Makosinski created the "Hollow Flashlight," which uses a thermoelectric effect to convert body heat into electricity to power LED bulbs. She also appeared on Forbes 2017 "30 Under 30" list.
