

Alumni Interaction 2018

Interaction of Alumni with the students and faculty was organised on 17th March 2018. Getting started with the inauguration for Alumni Meet. TIEDC member Soham Ahuja hosted the ceremony.

Our esteemed Registrar Maj Gen Rakesh Bassi (Retd.) established the fact of how idea's are important. He has been on the first Indian Expedition from Bombay to Bandar Abbas, Iran in 1977 in an 18-foot 1921-vintage wooden Seabird Class sailboat Albatross.

TIEDC Chairperson Dr. Ashish Rohila gave an elaborate presentation discussing the philosophy, objective and works of the TIEDC, JUIT. He talked about the facilities the incubator has to offer to the incubatees. The cell is well funded from the HPCED, Govt of Himachal Pradesh including a monthly fellowship grant of Rs 25,000 to the incubatees. He talked about the past events organised and also the future events planned. He further asked alumni's to support us in field of internships and entrepreneurial skills.

JUIT Alumni interacts with the students and shares their life experience at JUIT and life after JUIT.

VC of JUIT, Prof. Vinod Kumar also had a discussion with Alumni about their present life and experiences after passing out from JUIT.

Adventure seeking enthusiasts of the TIEDC eagerly waiting for the informal interaction session with alumni. These kids had lots of queries regarding their career goals which they would be asking to the alumni in the question jamming session. When the alumni arrived at TIEDC center, TIEDC members surrounded them asking about their experience in the University and after passing from JUIT. They asked many queries regarding their career, jobs and entrepreneurship. The alumni seemed to be enjoying mentoring their juniors and felt nostalgic talking about old memories. During interactive session between our alumni and TIEDC members one of our member deeksha asked a question about her inclination on BIO-ROBOTS. Her idea inspired by the earthquake in Japan and how we can provide the resources in case of natural calamities. Mr Shivam Gupta an aspiring entrepreneur and alumni of 2015 batch and founder of Azuratech elaborated about few startups working in the same field and how she can pursue her dream.

Our member Shivangi wants to explore space science and she inspired by the renowned entrepreneur Elon Musk. She flagged her doubt about ISRO - Indian Space Research Organisation criteria for the getting internships. On which our alumni Mr Tushar Gupta Clicklabs and Mr Shivam Gupta Co-founder Azuratech advised her to search the opportunities on private sector like Mahindra Aerospace.
