

Orientation Program

On 6th Oct 2021, Prof. Ashish Kumar, Chairman of TIED Cell gave orientation about the incubation center at JUIT to the first year students. He informed the students that Jaypee University of information technology Solan established the incubation center in the campus in Dec 2016 with the name Technology incubation and entrepreneurship development cell, TIEDC. The incubation center aims to provide an entrepreneurial ecosystem in the university. Board of the Cell includes Chairman, Prof. Ashish Kumar and Faculty Members Dr. Nishant Jain, Dr. Ekta Gandotra, and Dr. Deepak Gupta. In May 2017, the university signed an MoU with the department of industries under CM Startup scheme to promote startup activities. Till date we have received more than 180 startup ideas out of which more than 20 ideas have been incubated by the cell and many of them are running their venture successfully. To provide mentoring support to our incubatees, TIED Cell has collaborated with experts from the industries and from Academics. For the development of the startup ecosystem, to upgrade the students and incubatees with different skills required for startup, and to nurture ideas from young brilliant mind, throughout the year, TIEDC organizes different events like E-Summit, Hackathon, Vicharna, Startup Simulators, webinars, and workshops. TIED Cell welcomes innovative startup ideas throughout the year. Proposals can be submitted through TIED Cell website.

He informed the students about the role of the Incubation center in incubating the startup Ideas. He also motivated students to get involved with the cell activities that are related to Entrepreneurship and try to come up with some startup ideas during 4 years of Engineering.
