

Webinar of Shri. Ajit Boval

Date: 19th March 2019

Jaypee has always lent its dignified name to webinars, entrepreneurship summits, technical workshops and many such innovative platforms that help streamline the minds of our "young engineers" and budding entrepreneurs to take an effective decision on how to strike a fine balance between their personal and professional lives. Hence, around this very label of educating the students, the MHRD Innovation Cell invited Shri Ajit Doval Ji, National Security Advisor, Government of India, to conduct a virtual webinar on 'The Art of Decision Making' on 19th March 2019 at 11:30 A.M at a lecture theatre of our university.

The event turned out to be a massive success with unflagging cooperation and support of students who had assembled in numbers in the hope of taking away something new from this webinar.

The event kicked off with an introductory speech from Dr. Nishant Jain who briefed the audience about the purpose of our gathering. The projector was turned on, the photographers were all prepared to capture the scenario and the students were watching the big screen with unblinking eyes to catch the first glimpse of the man who was to go live any minute.

Shri Ajit Doval Ji appeared before us and began his motivational talk on how students should stabilize their minds and be able to take important decisions in their student life for the upliftment of their careers in future. He also elaborated on the establishment of startups so that the students could get a feel of what entrepreneurship feels like.

There were many examples of world-renowned entrepreneurs who he spoke about, who had started with nothing in their hands but a sense of hope of achievement in their business. This fulfilled our students up with the motivation they needed to carry with themselves on their own journeys.

In the context of stepping forth into the corporate world, he also emphasized the need of building a strong profile on platforms like LinkedIn to know and help students find their way into building

professional relations with entrepreneurs across the globe and share interests with them on the spheres that concern the world of entrepreneurship.

Over and out, the way the event turned out lived up to the expectations of the student community and the faculty alike and investing time into attending the event proved worth it.
