## About the Programme

India with over 1 billion population is rapidly emerging as superpower and set itself the target of becoming a developed nation in the forthcoming years. Many of the environmental challenges caused by the improper waste disposal practice in developing countries like India results in producing huge quantities of green house gas emissions. The resulting effect on climate change can be felt world over. Therefore the waste management has now become a matter of great concern. The present FDP aims at to discuss suitable techniques to ameliorate the environment load from the huge amount of residual generated by industrial development and consumption lifestyle.
