

Celebration of the Losar, 10th February

Bhutanese Students Association - JUIT, Solan

On 10th February 2024, we the members of Bhutanese Students Association, Jaypee University of Information Technology came together to celebrate the Losar, New Year.

The main reason to celebrate this day was to preserve and promote our culture and tradition by observing the Losar as we always does in Bhutan. At the same time, we can be able to keep our bond strong and solidarity will be maintained through this occasion as we come together to celebrate.

As part of celebration, the great day was graced by Dean of Academy and HoD of Biotechnology and Bioinformatics departments along with some faculty. The program started with cutting ceremony and prayers. After that the students (boys) played a Khuru(Dart) between 3rd year and 4th year students. The tea and snacks were served by girls and had sung different traditional songs. During lunch, Dean of Academy, HoD of Biotechnology and Bioinformatics departments along with some faculty joined with us and shared conversation among us. After a lunch, the program ended with group photo session.

The BSA would like to thank the administration of JUIT for the continuous support towards us. This program would not be successful without the helping hand of the JUIT Administration.

Thank You
