

Report on One-Day Workshop on CO-PO Mapping, Justification and Attainment

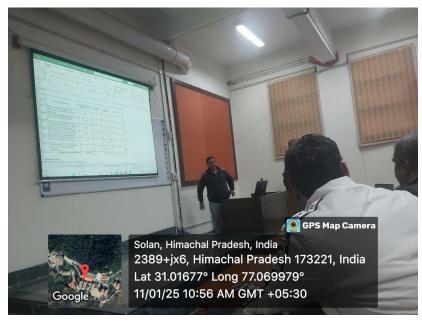

On January 11, 2025, a one-day workshop on CO-PO Mapping, Justification and Attainment was organized by Department of Biotechnology and Bioinformatics at JUIT, starting at 10:00 AM in CR3. The workshop was designed to provide Departments' faculty members with a comprehensive understanding of the methodologies and tools used to map and attain course outcomes (COs), program outcomes (POs) and Programspecific outcomes (PSOs) effectively. The event featured two speakers: Dr. Saurabh Bansal, Associate Professorand Prof. Sudhir Kumar, Head of the Department of Biotechnology and Bioinformatics. Dr. Bansal's presentation focused on the theoretical framework and significance of CO-PO mapping in curriculum design, while Prof. Kumar provided hands-on guidance on practical tools and techniques for effective CO-PO mapping and attainment.

The workshop included detailed discussions on the assessment and documentation of attainment, strategies for continuous improvement, and interactive Q&A sessions. Participants engaged in practical exercises and interactive discussions, enhancing their understanding of CO-PO mapping and attainment processes. The event successfully achieved its objectives, with participants gaining valuable knowledge and practical skills. The workshop was well-received, with attendees appreciating the insights and real-world examples provided by the speakers. The event was smoothly coordinated by Dr. Saurabh Bansal.
