

Faculty Development Program on “Advances in Civil Engineering”

A six days Faculty Development Program on ‘Advances in Civil Engineering’ was organized by the department of Civil Engineering along with Civil Engineering Consortium from January 14–19, 2019. The faculty development program (FDP) was conducted mainly for the advancement in civil engineering and to improve the performance of the civil engineering faculty members in various fields, especially in technical fields. It was conducted so that the faculty members become familiar and skilled in the latest technologies, find work balance by interacting with the industrial expert, and explore newer ways of learning, and innovative methodology of teaching.

Program Chair: Prof. Ashok K. Gupta, Head of the Department, Civil Engineering

Program Convener: Dr. Rajiv Ganguly, Associate Professor, Civil Engineering

Program Coordinators: Mr. Akash Gupta, Assistant Professor, Civil Engineering

Mr. Anirban Dhulia, Assistant Professor, Civil Engineering

The event started with the felicitation of guests followed by few words of wisdom by Major General Rakesh Bassi, Registrar and Dean of Students. Prof. Ashok K. Gupta HOD, CE, also shared few words highlighting the importance of conducting the program in the university.

The program schedule comprised mainly of guest lecture from Prof. S.K. Singh on the topic 'Management of Coal Ash: Utilization and Disposal Effects' and various other important lectures by faculty members of the Department of Civil Engineering. On each day, the program started at 10 am in the morning till 5pm in the evening with lectures by different professors on various topics focussing on the advancement in the fields of civil engineering.

The program ended with the detailed lecture by Prof. A.K. Gupta on the topic, 'The Vision for Civil Engineering in 2025.' Lastly, the program ended by awarding the certificates to the participants.
